FOR IMMEDIATE RELEASE

OAA establishes simulator marketing partnership with Japan Airlines (JAL)

Oxford Aviation Academy (OAA) is pleased to announce new simulator marketing partnership with leading international carrier Japan Airlines (JAL).

Through this new partnership, OAA will become JAL's designated representative in the Asia Pacific region and the Japanese carrier's simulator profile will be marketed and made available to airlines as part of OAA's extensive training portfolio. Significantly for Asia Pacific airlines, this simulator profile includes the B737-400, B737-800, B767-300, B747-400, B777-200, A300-600, and MD-90 types all based in the JAL Training Centre at Tokyo's Haneda Airport.

The development of this exclusive new training partnership will enable JAL to generate further business opportunities through its existing training facilities, while in addition enabling OAA to further enhance its training offering on an increased range of aircraft types for existing and new customers in Asia Pacific.

Mike Humphreys, OAA's Managing Director for Type Training commented: "We are very pleased to have been able to conclude this partnership and look forward to working closely with Japan Airlines in the future as a key part of our growth strategy for the Asia Pacific Region.

Hisashi Takada, Vice President Flight Training & Check Development Flight Operation at Japan Airlines added: "We are so glad to reach this partnership with OAA and it will enable potential customers in OAA's extensive network to use JAL's available simulators far more efficiently."

About Oxford Aviation Academy (OAA)

Oxford Aviation Academy (OAA) is one of the World's leading independent providers of innovative airline pilot, cabin crew, maintenance training and aviation resourcing services. It is truly unique in its ability to offer a fully integrated global flight crew supply chain.

The unparalleled scope, range and breadth of OAA's services represent over 150 years of combined experience in the industry, with facilities located throughout Australia, Asia Pacific, Europe and North America.

OAA is ideally placed to provide an integrated range of training and aviation resourcing solutions to the Asia Pacific airline industry. As a global organisation operating from 14 locations worldwide, the OAA group can provide local services and support to regionally based customers through extensive ab initio training facilities in Australia, a simulator and type training facility in Hong Kong and resourcing bases in Beijing and Tokyo.

OAA's Australia facility is a long established provider of cadet training and has trained thousands of pilots for some of the region's largest operators. The Hong Kong training facility provides locally approved type training solutions and hosts A320, A330/A340 and B737NG simulators for all training and check requirements. OAA's resourcing division, Parc Aviation, is also actively recruiting and assigning flight crew and technical personnel in the region to meet the ongoing expansion of operators. Operating as one aviation group, OAA provides integrated and tailored services to meet the individual requirements of customers.

OAA is owned by STAR Capital Partners and the GE Corporation.
